

VEGETABLE OILS GRADING AND MARKING RULES

1. **Short title and application:-** 1) These Rules may be called the Vegetable Oils Grading and Marking Rules, 1955.
2) They shall apply to Vegetable Oils produced in India.
2. **Definitions-** In these rules unless the context otherwise requires,-
 - 1) "Agricultural Marketing Adviser" means the Agricultural Marketing Adviser to the Government of India ;
 - 2) "Authorised packer" means a person or a body of persons, who has been granted a certificate of authorisation to grade and mark commodity in accordance with the grade standards and procedure prescribed under these rules.
 - 3) "Certificate of authorisation" means a certificate issued under the General Grading and Marking Rules, 1988,
 - 4) "Schedule" means schedules appended to these rules.
3. **Grade designations:-** The grade designation to indicate the quality of Vegetable Oils shall be as set out in column 1 of Schedule I to XVI
4. **Definition of quality:-** The quality indicated by the grade designations shall be as set out against such designations in Schedule I to XVI
5. **Grade designation marks :-** The grade designation marks shall consist of;
 - (i) A label specifying name of the commodity, grade designation and bearing a design consisting of an outline map of India with the word "AGMARK" and the figure of rising sun with the words "Produce of India" and the emblem of India resembling the one as set out in Schedule XVII-A ; or
 - (ii) Agmark replica consisting of design incorporating the number of certificate of authorisation, the word "AGMARK", the name of the commodity, the grade designation resembling the one as set out in Schedule XVII-B;

Provided that the use of Agmark replica in lieu of Agmark labels shall be allowed to such authorised packers who have been granted permission, by the Agricultural Marketing Adviser or an officer authorised by him in this behalf and subject to conditions as specified from time to time
6. **Packing provisions:-** 1) Vegetable Oils shall be packed either in new, sound, clean and rust free tins or in clean bottles., mild steel drums, railway tank wagons or in approved clean and new thermo plastic containers/ flexible packs like pouches, cans, bottle jars etc.
2) The plastic containers shall be manufactured out of food grade plastic materials permitted under Prevention of Food Adulteration rules , 1955.

- 3) The Vegetable Oils shall be packed in the standard size namely, 100gms., 200gms., 500gms, 1Kg, 5Kgs and thereafter in multiples of 5 Kgs net weight. The edible vegetable oils may also be packed in corresponding volumetric packings expressed in milli-liters or liters along with their weights in gms/kgs as the case may be.
- 4) The containers of oils shall be free from any contaminants and shall not be composed of whether wholly or in part, any poisonous or deleterious substance which renders the contents injurious to health.
- 5) The container of oils shall be free from insect infestation, fungus contamination or any obnoxious and undesirable smell.
- 6) The packing shall be done in the manner prescribed for different types of packing,
7. **Marking provisions-** 1) The grade designation mark shall be securely affixed to each container in a manner approved by the Agricultural Marketing Adviser. In addition to the grade designation mark, the following particulars shall also be clearly and indelibly marked on each container:-
 - (a) Name of packer.
 - (b) Place of packing (business address)
 - (c) Tank filling No.
 - (d) Date of packing in plain letters.*
 - (e) Net weight /volume (wherever applicable)

Note* : the date of packing shall be the date of completion of analysis of the sample.

- 2) An authorised packer may after obtaining the prior approval of the Agricultural Marketing Adviser or an officer authorised in this behalf, mark his private trade mark on a container in a prescribed manner;

Provided that private trade mark does not represent quality or grade of the Vegetable Oil different from that indicated by the grade designation mark affixed on the container in accordance with these rules.
8. **Special conditions of certificate of authorisation:-** In addition to the conditions specified in sub-rule (8) of rule 3 of the General Grading & Marking Rules, 1988, the conditions set out in Schedule III shall be the conditions of every Certificate of Authorisation issued for the purpose of these rules.
9. **Repeal and Savings :-** The Edible Oils Grading and Marking Rules, 1939 and the Castor Oil Grading and Marking Rules, 1949, are hereby rescinded without affecting the previous operation of the said rules or anything duly done or suffered thereunder.

Note :- Each label shall have printed thereon a serial number along with a letter or letters denoting the series e.g. A. 004378.

1.2	0.25 to 0.60	1.5	23.0 to 27.5	Neg.	Neg.	Neg.
1.2	0.10 to 0.60	4.0	23.0 to 27.5	Neg.	Neg.	Neg.

DESCRIPTION

15

Refined : Mustard oil shall be obtained by a process of expression of clean and sound mustard seeds of *Brassica campestris* Linn, (yellow and brown sarson) or *Brassica juncea* Linn, (Lahi, rai or laha) or *Brassica napus* (rape or toria), or admixture of these seeds, or by a process of solvent extraction** of good quality of mustard oil cake or sound mustard seeds.

The oil shall be refined by neutralisation with alkali and/or physical refining/or by miscella refining using permitted food grade solvents followed by bleaching with adsorbent earth and/or activated carbon and deodorisation with steam.

No other chemical agent shall be used.

Grad-I : Mustard oil shall be obtained by a process of expression of clean and sound mustard seeds of *Brassica campestris* linn (yellow and brown sarson) or *Brassica Juncea* Linn., (Lahi, rai or laha) or *Brassica napus* (rape or toria) or admixture of these.

Grade-II : Mustard oil shall be obtained by a process of expression of clean and sound mustard seeds of *Brassica campestris* Linn., (yellow and brown sarson) or *Brassica Juncea* Linn, (Laha, rai or laha) or *Brassica napus* (rape or toria) or admixture of these.
oil

GENERAL REQUIREMENTS

16

The oil shall have characteristic and acceptable taste and flavour
The oil shall be clear and free from turbidity when a filtered sample of oil is kept for 24 hours at 30°C. The oil shall be free from rancidity, adulterants, sediments or suspended matter or mineral oils, or any foreign matter or oils. It shall also be free from separated water, added colouring or flavouring matter, obnoxious odour. The oil may contain permitted anti-oxidants not exceeding in concentration as specified under Prevention of Food Adulteration Rules, 1955.

The oil shall have characteristic and acceptable taste and Flavour. The oil shall be free from rancidity, adulterants, sediments or suspended matter, or mineral oils, or any foreign matter or oils. It shall also be free from separated water, added colouring or flavouring matter and obnoxious odour. The oil may contain permitted anti-oxidants not exceeding in concentration as specified under Prevention of Food Adulteration Rules 1955.

The oil shall have characteristics and acceptable taste and flavour. The oil shall be free from rancidity, adulterants, sediments or suspended matter, or mineral oils, or any foreign matter or oils. It shall also be free from separated water, added colouring or flavouring matter and obnoxious odour. The oil may contain permitted anti-oxidants not exceeding in concen-

tration as specified under Prevention of Food Adulteration Rules, 1955.

* In the absence of Lovibond Tinto-meter the colour shall be matched against standard colour comparaters.

** In case of solvent extracted oil, the flash-point by Pensky-Martens (closed cup) method shall not be less than 250°C and the containess shall be marked "Solvent Extracted".

General Requirements

15

0.8

The oil shall be the refined fixed oil
obtained by cold expression of
Caster Seed (*Ricinus communis*)

The oil shall be clear and free from admixture with
other oils or substances and also free from sediments,
suspended matter, added colouring and flavouring
substances.

Solubility - The oil shall be soluble in 2.5 parts of ethyl
alcohol (95% V/V). Further it shall be miscible with
absolute ethyl alcohol with chloroform with solvent
ether and with glacial acetic acid.

Identification :- The oil shall be miscible with half its volume of light petroleum (boiling range 40° to 60°C) and is only partially soluble in two volumes.

SCHEDULE-VII
(See Rules 3 and 4)

Agmark grade designation and definition of quality of Niger Seed Oil

Definition of Quality

Grade Designation	Moisture and insoluble impurities percent by weight (not more than)	Colour on Lovibond scale* in 1/4" cell, expressed as Y + 5R (not deeper than)	Specific gravity at 30°C/30°C	Refractive Index at 40°C	Saponification value	Iodine value (Wij's method)	Unsaponifiable matter percent by weight (not more than)
1	2	3	4	5	6	7	8
Refined	0.10	8	0.917 to 0.920	1.4665 to 1.4691	189 to 193	110 to 135	0.8
Grade-I	0.25	15	0.917 to 0.920	1.4665 to 1.4691	189 to 193	110 to 135	1.0

* In the absence of Lovibond Tintometer, the colour shall be matched against standard colour comparator.

** In the case of solvent-extracted oil, the flash point by Pensky-Martens (closed-cup) method, shall not be less than 250 °C and the container shall be marked "Solvent Extracted"

		Definition of Quality	
Acid value (not more than)	Bellier's Turbidity temp. (by Everetts acetic acid method) in °C	Description	General Requirements
9	10	11	12
0.5	25 to 29	Niger seed oil shall be obtained either by process of expression of clean and sound seeds of niger plant (<i>Guizotia abyssinica</i>) or by a process of solvent extraction of good quality nigerseed oil cake or clean and sound seeds of <i>Guizotia abyssinica</i> . The oil shall be deacidified either with alkali and /or by physical refining and/or by miscella refining using permitted food grade solvents followed by bleaching earth and/or carbon and deodorised with steam. No other chemical agent shall be used.	The oil shall be clear and free from turbidity when a filtered sample is kept for 24 hrs. at 30°C. The oil shall be free from rancidity, admixture of other oils or substances. The oil shall also be free from mineral oil, sediments, suspended matter, separated water, obnoxious odour, added colouring and flavouring substances. The oil may contain permitted anti-oxidants not exceeding in concentration as specified under prevention of Food Adulteration Rules, 1955.
5.0	25 to 29	Niger seed oil shall be obtained by a process of expressing clean and sound seeds of Niger plants (<i>Guizotia abyssinica</i>) only.	The oil shall be clear and free from rancidity, admixture of other oils or substances. The oil shall also be free from mineral oil, sediments, suspended matter, separated water, obnoxious odour, added colouring and flavouring substances. The oil may contain permitted anti-oxidants not exceeding in concentration as specified under Prevention of Food Adulteration Rules, 1955

Grade designation definition of quality for Vegetable Oils (Non-specified)

Grade designation	Special Characteristics	General Requirements
1	2	3
N.S. Grade* (non-specified)	Any vegetable oil mentioned in the Schedule 1 to XV shall conform to the specific characteristics referring to the quality of the oil as agreed between the buyer and	1. The specific vegetable oils shall be obtained in the manner prescribed in the respective schedule and satisfy the requirements of the buyer. 2. The oil shall be free from adulterants, sediments, separated water, suspended foreign matter, other oils, added colouring and flavouring substances.

NOTE : 1. The non-specified (N.S.) grade is applicable only :

- (i) to the vegetable oils meant for export :
 - (ii) to the vegetable oils for which definitions of quality have not been mentioned in any of the Schedule 1 to XV; and
 - (iii) to the vegetable oils for which definitions of quality have been mentioned in the said schedules, but those definitions do not satisfy the quality requirements of the buyer.
- 2 The buyers' specific requirements regarding quality and quantity of the vegetable oil shall be produced along with the application for inspection.
3. The certificate of Agmark Grading shall bear the details of quality requirements of the buyer and a copy of the buyer's order shall be appended.

SCHEDULE - XVIII

Special conditions of the Certificate of Authorisation

- (a) An authorised packer shall take all precautions to avoid contamination of edible vegetable oils with lead or zinc during processing, storage and packing.
- (b) If an authorised packer handles more than one type of vegetable oils in the same premises, adequate precautions shall be taken by him to avoid the mixing of different oils.

- (c) An authorised packers shall make such arrangements for testing vegetable oils as may be prescribed from time to time by the Agricultural Marketing Adviser. He shall also maintain proper records of the analysis of samples.
- (d) All instructions regarding method of sampling and analysis, sealing and marking of containers and the maintenance of records etc. which may be issued from time to time by the Agricultural Marketing Adviser, shall be strictly observed.
- (e) Each container of approved packing material shall be filled with oil from one storage tank or tank wagon only.
